DETAILED ACTION

In response to the amendment filed 10/30/2006:

New claims 76-78 have been added to the application;

Claim 18 rejected under 35 U.S.C. 112, second paragraph, is withdrawn; and

Rejection of new claims 76-78 follows.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Kathleen Franklin on January 5, 2007.

The application has been amended as follows:

Canceled withdrawn claims 57-75.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 76-78 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 5,663,473 to Griffiths et al. (hereinafter "Griffiths").

Griffiths discloses a process for converting a liquid paraffin-containing hydrocarbon to olefins (abstract and page 3, lines 10-18). The process comprises introducing the liquid paraffin-containing hydrocarbon and oxygen containing gas separately and mixing the two prior to contacting a catalyst. Griffiths also discloses introducing a liquid hydrocarbon into a reaction chamber as a spray of droplets such that partial vaporization and homogeneous mixing may result. See col. 2, line 35 to col. 3, line 24.

It is noted that Griffiths does not explicitly disclose production of alpha-olefin. However, since the process of the reference is essentially the same as the claimed process, alpha-olefin would inherently be one of the products produced by the process of Griffiths.

Allowable Subject Matter

Claims 1-56 are allowed.

The following is an examiner's statement of reasons for allowance: Although the closest prior art to Yokoyama et al. cited in the Office Action discloses a similar catalytic oxidative dehydrogenation process utilizing similar feed, catalyst, and conditions, the cited reference does not disclose nor suggest the claimed step of forming a film of the fuel source on a wall of the reactor.

Response to Arguments

Applicant's arguments, filed 10/30/2006, with respect to claims 1-56 have been fully considered and are persuasive.

Applicant's arguments with respect to newly added claims 76-78 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
